

# **Hepatitis C: Treatment and Elimination ECHO**

ECHO is a tele-mentoring program that uses videoconferencing technology to combine brief expert presentations with interactive and practical case presentations from participants. The overall goal of this ECHO is to build new capacity for Hepatitis C treatment at the community level. This ECHO is funded by the SAMHSA State Opioid Response grant through OHA.

# This 16 session ECHO series will cover:

- The screening, diagnosis, and treatment of Hepatitis C
- Assessing fibrosis of the liver
- Understanding the natural history of cirrhosis and its complications
- Management of decompensated cirrhosis and when to consider liver transplant
- · Screening, diagnosis and treatment of Hepatitis B
- Hepatocellular carcinoma
- Developing community partner networks
- Harm reduction
- Management of substance use disorders

### **Benefits of participation:**

- No cost to you or your facility
- Free continuing medical education (CME) credits\*
- Free maintenance of certification (MOC) part 2 credits for internal medicine clinicians\*
- The opportunity to present your tough patient or system-level cases and receive feedback from a multidisciplinary team of specialists and your peers

Sessions for this cohort will occur via Zoom videoconference every Thursday, 12:00-1:00 p.m., January 11, 2023 through May 2, 2024.

This ECHO is intended to serve clinical teams including prescribing clinicians (MD, DO, PA, NP), pharmacists, nurses, medical assistants, peer support specialists, care coordinators, community health workers, and medical staff working in carceral facilities. Other supporting staff could include practice managers, case managers and behavioral health specialists.
